

Automatic Calibration Modules

300 kHz to 12, 18 & 26.5 GHz

Withwave's Automatic Calibration Modules are ideal for users who want fast and easy calibration for various Vector Network Analyzers (VNA).

These modules are powered up via USB or Φ 5.5 DC connector and communicate with VNA via USB or LAN and designed for full one-port through two-port calibrations of VNAs by **One-Push START button**. These modules work as host systems, measures and calculates calibration coefficients and sends it to VNA easily.

One-Push START button

NEW

• T-Probe (40 GHz)

- GSG, GS Configurations
- 0.8, 1.5, 2.5 mm pitch range
- Pogo pin structure

It's compatible with following VNAs:

- *Keysight PNA series, ENA series*
- *Rohde & Schwarz ZVL, ZVA series, ZVT series*
- *Anritsu ShockLine Series*
